Regularity

For qualifying (practice) a number of cars from the super sprint grid will be assigned to the regularity grid so as to avoid exceeding the allowable track density for super sprint grids. The selection will be based on experience with regularity, known respect for other drivers and minimising performance differentials.

Super Sprint

The split for super sprint will be advised shortly and will probably be designed to have all Clubmans in the same group. The grids will only be combined if the number running falls below 24 cars.

However, for qualifying (practice) a number of super sprint cars will be assigned to the regularity grid so as to avoid exceeding the allowable track density for super sprint grids. The selection will be based on experience with regularity, known respect for other drivers and minimising performance differentials.
